

1 Problem 1

Running the **ls -alF** command on the top level directory of the flash drive:

Output: included in the txt file: *Problem_1_outputs_a.txt*

Running the **ls -alF** command on the top level directory of the most recent backup on the flash drive:

Output: included in the txt file: *Problem_1_outputs_b.txt*

2 Problem 2

Using the **diff** command on the python code used to solve Problem 3 and **img.py** we have the output:
included in the .txt file: *Problem_2_outputs.txt*
